1. On app.mobilizinghealth.org, have a button to start a Project in India
2. Leads to a form that they have to fill out:
    a. Your Name:
    b. Your Organization's/Company's Name:
    c. Type of Work:
    d. Country:
    e. Your website:
    f. Your email address:
    g. Your Username:
    h. [Picture of words box] - What does the above picture say? _____
    i. Submit
3. This will set up a project, but before giving permission to start one, send us an email to confirm.
4. Once one of us confirms, they will get an email with their log-in information (website, username, and temporary password).
5. Once they log-in for the first time, they have to accept the terms and use agreement
6. Go through set up process - *have a "save and do later" option while going through this
    a. Set your password (ask for username and temporary password to verify)
    b. Add project information
        i. Check boxes:
            1. I will have VHDs send in messages for patients (start SMS with REQ) - default
            2. I will have patients send in messages for themselves (start SMS with HLP)
            3. Messages back to the village will include the doctor's name - default
            4. Message back to the village will include the doctor's mobile number - default
        ii. Text boxes:
            1. When someone is not registered in the system but sends a message, what message should go out to them? _____ (we suggest you use the roman-local language)
            2. When no doctor responds to a particular case, what message do you want to go back out to the Village Health Director? _____ (we suggest you use the roman-local language)
            3. When a Village Health Director sends a message to the system with the wrong format, what message do you want to go out to them? _____ (we suggest you use the roman-local language)
        iii. Pull-down menus
            1. Which dedicated long code do you want to use which everyone will send messages to? (Maharashtra[default] or WB)
            2. Time zone (default to what country they put)
        **what's not in setup is the timings of messages (minutes until you page a new doc, until you alert a PM, until the case closes without a doctor's answer, minutes until a doc is reminded after an ACC to give FIN, minutes until a case is closed after a doc ACC's but no FIN). tell them that they can change the timings in the settings page
    a. Add project managers
        **you can edit project manager alerting schemes in the settings, default is for all of them to get all copies and all the alerts.
    a. Add VHDs
    b. Add doctors

      c. Doctor paging sequence (multiple choice)
         i. (defalt) Random
        ii. Specify an order:
            1. a table of doctors with all default being random. can change to "None"

Things they can do later:
- Edit the notify schemes
- Edit the timings for when messages are sent out
